Portfolio: <https://georgia-antoniou.github.io/>

Enthusiastic and detail-oriented professional with ISTQB Foundation Level certification and hands-on testing experience, seeking an internship or junior software tester position. Certified in SQL PostgreSQL, I'm currently gaining practical experience as a beta tester at Socra.com, applying experience-based testing techniques. Bringing 2+ years of leadership experience with strong analytical and problem-solving skills, combined with a diverse educational background that demonstrates adaptability and quick learning ability.

Technical Skills

- Testing Methodologies: Manual Testing, Black Box Testing, Test Case Design
- Testing Techniques: Experience-based Testing (Exploratory Testing), Black box Testing (Boundary value Analysis, Transition State, Decision Table and Equivalence Partitioning)
- Testing Tools: Jira, Zephyr Scale, Azure DevOps, Very basic JMeter knowledge, Basic knowledge of Postman
- Test Automation & Programming: **Programming Language C#**, **Automation Tools** Playwright (Basic knowledge), **IDEs** Familiarity with Visual Studio and JetBrains Rider, **Version Control** Basic knowledge of Git/GitHub for code management, branching, committing, and pulling changes.
- Documentation: Test cases, Test scenarios, Bug Reports
- Soft Skills: Leadership, Team Training, Problem-solving

Certifications

Udemy GenAI & AI Agents for QA Test Automation | Copilot & Claude

CodeCademy Learn SQL Course (June 2026)

CodeCademy Intro to AI Agents Course (June 2026)

Udemy Master Playwright C# (.NET) (January 2026)

CodeCademy Learn C# Course (October 2025)

CodeCademy Intro to C# Course (October 2025)

Udemy The complete SQL Bootcamp: Go from Zero to Hero (May 2025)

Udemy Quick Introduction to Postman and API Testing for Beginners (March 2025)

ISTQB Foundation Level Certification (February 2025)

Udemy The Complete 2024 Software Testing Bootcamp (October 2024)

CodeCademy Certificate Learn CSS Course (December 2021)

CodeCademy Certificate Learn HTML Course (November 2021)

Professional Experience

uTest Project: Rollex Application

Freelance QA Tester

As a freelance QA Tester on the uTest platform, I contributed to the quality assurance of the Rollex application. My responsibilities included executing test cases and reporting bugs based on a client's specific requirements. Due to the confidential nature of this project, specific test cases and bug report details cannot be shared. This experience showcased my ability to work within a professional testing environment, adhere to client-defined test scenarios, and provide high-quality, actionable bug reports.

- Executed pre-defined test cases to verify the functionality and performance of the Rollex application.
- Documented and submitted professional-grade bug reports, adhering to the client's and uTest's quality standards.

- Collaborated effectively with the uTest community and project managers.
- Adhered to project-specific Non-Disclosure Agreements (NDAs).

Beta Tester

socra.com (June 2024 - Present)

On the Socra AI Platform, an AI development project, I acted as a Beta Tester and UAT Specialist. I applied **exploratory testing** methodologies to evaluate the platform's functionality and user experience. Without access to formal requirements, I creatively navigated the system to identify defects, usability issues, and potential improvements, providing valuable, user-centric feedback. This role allowed me to showcase my ability to critically assess a complex application in a professional test environment.

- Execute exploratory testing to identify software defects and usability issues
- Apply experience-based testing techniques to evaluate system functionality
- Utilize Jira and Zephyr Scale for test management and bug tracking
- Document and report bugs with detailed steps to reproduce
- Collaborate with development team to improve product quality

Supervisor

Insomnia Coffee Company - Bettystown, County Meath (July 2023 - October 2024)

- Successfully managed entire store operations independently
- Effectively communicated with management to address staffing issues and establish working standards
- Played key role in new shop launch, leading team through initial challenges
- Successfully trained and onboarded 5 new employees
- Demonstrated strong leadership and problem-solving abilities

Supervisor

Insomnia Coffee Company - Portmarnock, County Dublin (May 2022 - July 2023)

- Promoted to supervisor within 6 months due to exceptional performance

- Trained and mentored 2 new employees
- Maintained high quality standards and operational efficiency

QA Testing Projects

Nick Polyderopoulos Portfolio

Manual and Automation Tester

Developed a robust automated regression suite for a professional portfolio site using Playwright and C#. The project focuses on ensuring UI stability, theme consistency, and responsive navigation through advanced element interactions and automated reporting.

- **Automated UI Validation:** Scripted automated tests to verify complex UI components, including theme toggling (Dark/Light mode) by asserting dynamic changes in CSS link attributes.
- **Advanced Interaction Testing:** Developed logic to verify the functional state of expandable sections (Skills, Experiences) using attribute assertions and visibility checks.
- **State-Based Navigation Testing:** Engineered tests for the Hamburger navigation menu by monitoring dynamic CSS class changes during sidebar transitions.
- **Automated Failure Reporting:** Implemented a custom [TearDown] mechanism that automatically captures full-page screenshots and attaches them to NUnit test results upon failure for rapid debugging.
- **Stability Engineering:** Optimized test reliability by replacing brittle XPath paths with resilient user-facing locators and implementing auto-retrying assertions to handle asynchronous page renders.

File Organizer

Author and Automation Tester

A robust command-line utility designed to solve the problem of digital clutter. The application scans a target directory and automatically categorizes files into a structured hierarchy based on File Type (Images, Documents, Installers, Videos) and Creation Date (Year/Month). It features intelligent conflict resolution to handle duplicate filenames without data loss and utilizes a Separation of Concerns architecture to ensure business logic is isolated from file system operations.

Agile Travel (Demonstration Project)

Manual Tester

For the Agile Travel project, I performed **manual exploratory testing** to evaluate the web application's quality and functionality. I systematically explored the application to uncover bugs and design flaws, which I then formally documented into detailed **test cases and bug reports**. My work demonstrated my proficiency in both creative defect discovery and structured documentation, providing a clear record of my testing process.

- **Conducted manual exploratory testing** across the Agile Travel application to uncover bugs and potential user experience flaws.
- **Authored** detailed **test cases** based on exploratory findings, creating a structured and reusable test suite.
- **Documented** and reported all discovered defects in a bug-tracking system, including steps to reproduce, expected vs. actual results, and supporting screenshots.
- **Collaborated** with a simulated development team to report bugs and verify fixes, demonstrating proficiency in the defect lifecycle.

Web Application Testing Project: Sweet Shop

Manual & Exploratory Tester

On the **Sweet Shop** project, an intentionally broken web application, I performed comprehensive **exploratory and manual testing** to identify and document defects. My primary focus was to evaluate the site's functionality from an end-user perspective, with particular attention given to the **payment processing functionality**. This experience allowed me to practice my skills in discovering common real-world web application issues.

- **Conducted** in-depth manual and exploratory testing across the Sweet Shop web application.
- **Focused** testing efforts on the payment processing and e-commerce functionalities, identifying critical defects in the checkout flow.
- **Documented** bugs and provided clear, concise reports.

Education

Diploma in Assistant Physiotherapist
Vocational Education and Training of Volos - Volos
October 2017 to June 2019

Diploma in Nursing Assistant
Vocational Senior High School of Volos - Volos
September 2011 to June 2014

Additional Skills

- Team coordination and mentoring
- Customer service expertise
- Strong attention to detail
- Adaptability and quick learning ability
