

Test Cases

Test cases for Nick Polyderopoulos Portfolio

Test Case #1

Home page content

- **Precondition:** Site deployed on GitHub Pages.
- **Steps:** Open <https://nickpolyder.github.io/>
- **Expected Result:**
 - Title shows "**Nick Polyderopoulos**".
 - Subtitle shows "**Software Engineer II @ Microsoft**".
 - Profile image is centered and visible.
 - Navigation sidebar is visible on the left side.

Test Case #2

Theme mode functionality

- **Steps:**
 1. Open <https://nickpolyder.github.io/>
 2. Click the **Theme Toggle** icon in the top right header.
 - **Expected Result:**
 - The site background and syntax highlighting switch to **Light Mode**.
-

Test Case #3

Navigation drawer (Mobile/Small Screen)

- **Steps:**

1. Open <https://nickpolyder.github.io/>
2. Click the **Hamburger Menu** icon.

- **Expected Result:**

- The sidebar navigation drawer collapses or expands based on the current state.
 - The HTML class for the drawer updates to include **"close"** or **"open"** dynamically.
-

Test Case #4

Social Media Connectivity

- **Steps:**

1. Open <https://nickpolyder.github.io/>
2. Scroll to the footer of the sidebar and click the **GitHub** icon.

- **Expected Result:**

- A new browser tab opens navigating to <https://github.com/NickPolyder> .
-

Test Case #5 (Negative)

DNS Resolution Error

- **Steps:**

Open <https://nickpolyder.github.ia/> (incorrect top-level domain).

- **Expected Result:**

- The browser fails to resolve the domain.
 - The automation captures a `net::ERR_NAME_NOT_RESOLVED` error.
-

Test Case #6

LinkedIn External Link

- **Precondition:** Site deployed on GitHub Pages.
 - **Steps:**
 1. Open <https://nickpolyder.github.io/>
 2. Click the **LinkedIn** icon located in the sidebar footer.
 - **Expected Result:**
 - A new browser tab opens.
 - The URL in the new tab is exactly <https://www.linkedin.com/in/nick-polyderopoulos-21742397/>.
-

Test Case #7

Twitter (X) External Link

- **Precondition:** Site deployed on GitHub Pages.
 - **Steps:**
 1. Open <https://nickpolyder.github.io/>
 2. Click the **Twitter** icon located in the sidebar footer.
 - **Expected Result:**
 - A new browser tab opens.
 - The URL in the new tab is exactly <https://x.com/nickpolyder>.
-

Test Case #8

Stress Test: Rapid Theme Toggling

- **Steps:**
 1. Open <https://nickpolyder.github.io/>
 2. Click the **Theme Toggle** icon 10 times in quick succession.
- **Expected Result:**
 - The website remains stable and responsive without freezing.

- The `#prism-theme` attribute contains a valid link to either the light or dark CSS file after the final click.

Test Case #9

Navigation Stability (Rapid Switching)

- **Steps:**

1. Open `https://nickpolyder.github.io/`
2. Click the **Blog** link and immediately click the **Home** link before the page fully transitions.

- **Expected Result:**

- The application cancels the first navigation request gracefully.
- The browser successfully settles on the Home page URL.
- The main identity heading "Nick Polyderopoulos" is visible.

Test Case #10

Profession Data Integrity

- **Steps:**

1. Open `https://nickpolyder.github.io/`
2. Locate the professional title text under the main name.

- **Expected Result:**

- The text content matches exactly: **"Software Engineer II @ Microsoft"**.

Test Case #11

Accordion/Toggle: "What I Offer" Section

- **Precondition:** Site deployed on GitHub Pages.
- **Steps:**

1. Navigate to <https://nickpolyder.github.io/>.
 2. Click on the **"What I Offer"** heading to expand the section.
 3. Observe the visibility of the content (e.g., "Innovation-Driven Leadership").
 4. Click the **Expansion Arrow** to collapse the section.
- **Expected Result:**
 - The content **"Innovation-Driven Leadership"** becomes visible upon the first click.
 - The content is successfully hidden (not visible) after clicking the expansion arrow.
-

Test Case #12

Accordion/Toggle: "Experiences" Section

- **Precondition:** Site deployed on GitHub Pages.
 - **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Click on the **"Experiences"** heading to expand the section.
 3. Verify the visibility of the first job role.
 4. Click the expansion arrow to collapse the section.
 - **Expected Result:**
 - The first job details become visible upon expansion.
 - The job details are hidden after the section is collapsed.
-

Test Case #13

Experience Stepper: Enterprise Registry Solutions

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Click on the **"Experiences"** heading.
 3. Click the stepper button for **"Enterprise Registry Solutions"**.
- **Expected Result:**

- The content updates to display text containing: **"As Application Architect for ERS"**
-

Test Case #14

Experience Stepper: Customedialabs

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Click on the **"Experiences"** heading.
 3. Click the stepper button for **"Customedialabs"**.
 - **Expected Result:**
 - The content updates to display text containing: **"LMS portal"**.
-

Test Case #15

Experience Stepper: ITWorx

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Click on the **"Experiences"** heading.
 3. Click the stepper button for **"ITWorx"**.
 - **Expected Result:**
 - The content updates to display text containing: **"HIVICU"**.
-

Test Case #16

Experience External Link: Microsoft

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Click on the **"Experiences"** heading.

3. Click the "<https://www.microsoft.com>" link.
 4. Verify the new URL and then click the browser's back button.
- **Expected Result:**
 - The browser navigates to <https://www.microsoft.com/en-us> .
 - After going back, the browser returns to <https://nickpolyder.github.io/> .
-

Test Case #17

Experience External Link: Enterprise Registry Solutions (ERSL)

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/> .
 2. Click on the "**Experiences**" heading.
 3. Select the "**Enterprise Registry Solutions**" stepper.
 4. Click the "<https://www.ersl.ie/>" link.
 5. Verify the URL and navigate back.
 - **Expected Result:**
 - The browser navigates to <https://ersl.ie/> .
 - The browser successfully returns to the portfolio home page.
-

Test Case #18

Experience External Link: Customediabls

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/> .
 2. Click on the "**Experiences**" heading.
 3. Select the "**Customediabls**" stepper.
 4. Click the "<https://customediabls.com>" link.
 5. Verify the URL and navigate back.
- **Expected Result:**

- The browser navigates to <https://www.customedialabs.com/> .
 - The browser successfully returns to the portfolio home page.
-

Test Case #19

Experience External Link: ITWorx

- **Steps:**

1. Navigate to <https://nickpolyder.github.io/> .
2. Click on the **"Experiences"** heading.
3. Select the **"ITWorx"** stepper.
4. Click the **"<https://itworx.gr/>"** link.
5. Verify the URL and navigate back.

- **Expected Result:**

- The browser navigates to <https://itworx.gr/> .
 - The browser successfully returns to the portfolio home page.
-

Test Case #20

Accordion/Toggle: "Education" Section

- **Precondition:** Site deployed on GitHub Pages.

- **Steps:**

1. Navigate to <https://nickpolyder.github.io/> .
2. Click on the **"Education"** heading to expand the section.
3. Verify the visibility of the education content.
4. Click the expansion arrow to collapse the section.

- **Expected Result:**

- The text **"Computer Science and Engineering TE..."** becomes visible upon expansion.

- The education content is hidden (not visible) after clicking the expansion arrow.

Test Case #21

Data Integrity: Education Content

- **Steps:**

1. Navigate to <https://nickpolyder.github.io/>.
2. Click on the **"Education"** heading to expand the section.
3. Locate the degree description text.

- **Expected Result:**

- The content contains the text: **"Computer Science and Engineering"** (case-insensitive).

Test Case #22

Quantity Verification: Bachelor Degrees

- **Steps:**

1. Navigate to <https://nickpolyder.github.io/>.
2. Locate all horizontal rules with the class `bg-education-bachelor`.

- **Expected Result:**

- The total count of elements matching the Bachelor indicator is exactly **1**.

Test Case #23

Quantity Verification: Professional Certificates

- **Steps:**

1. Navigate to <https://nickpolyder.github.io/>.
 2. Locate all horizontal rules with the class `bg-education-certificate`.
- **Expected Result:**
 - The total count of elements matching the Certificate indicator is exactly **5**.
-

Test Case #24

Accordion/Toggle: "Skills" Section

- **Precondition:** Site deployed on GitHub Pages.
 - **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Click on the **"Skills"** heading to expand the section.
 3. Verify the visibility of skill categories (e.g., "Frameworks").
 4. Click the expansion arrow to collapse the section.
 - **Expected Result:**
 - The category **"Frameworks"** becomes visible upon expansion.
 - The skills content is hidden (not visible) after clicking the expansion arrow.
-

Test Case #25

Filter Functionality: "Familiar" Skills

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Expand the **"Skills"** section.
 3. Click the **"Familiar"** filter button.
- **Expected Result:**
 - The skill **"UWP"** is visible.

- Non-matching categories like **"Methodologies"** are hidden.
-

Test Case #26

Filter Functionality: "Intermediate" Skills

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Expand the **"Skills"** section.
 3. Click the **"Intermediate"** filter button.
 - **Expected Result:**
 - The skill **"Xamarin"** is visible.
 - Non-matching categories like **"Design Patterns"** are hidden.
-

Test Case #27

Filter Functionality: "Advanced" Skills

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Expand the **"Skills"** section.
 3. Click the **"Advanced"** filter button.
 - **Expected Result:**
 - The skill **"ADO.NET"** is visible.
 - Non-matching categories like **"CI/CD Pipelines"** are hidden.
-

Test Case #28

Filter Functionality: "Expert" Skills

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.

2. Expand the **"Skills"** section.
 3. Click the **"Expert"** filter button.
- **Expected Result:**
 - The skill **"MS SQL"** is visible.
 - Non-matching skills like **"MassTransit"** are hidden.
-

Test Case #29

Filter Functionality: "Show All" Reset

- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Expand the **"Skills"** section.
 3. Click the **"Show All"** button.
 - **Expected Result:**
 - Skills from all levels (e.g., **"MS SQL"**, **"UWP"**, **"ADO.NET"**, **"WPF"**) are simultaneously visible.
-

Test Case #30

Navigation: Blog Page URL

- **Precondition:** Site deployed on GitHub Pages.
- **Steps:**
 1. Navigate to <https://nickpolyder.github.io/>.
 2. Click on the **"Blog"** link in the navigation menu.
- **Expected Result:**
 - The browser navigates to the blog section.
 - The current URL is exactly <https://nickpolyder.github.io/blog>.

Test Case #31

Blog Section: Placeholder Content

- **Steps:**

1. Navigate directly to <https://nickpolyder.github.io/blog> .
2. Locate the main heading element on the page.

- **Expected Result:**

- The heading text content is equal to "**Coming Soon**".
-
